(ATTORNEY DOCKET NUMBER: 41563-0010)

Remarks

This Reply is in response to the Office Action mailed August 3, 2005. Claims 41-52 were pending in the application. No claims are amended or canceled. Thus, claims 41-52 are pending for reconsideration at this time.

Applicants thank the Examiner for allowing claims 42-46 and 48-52.

In the Office Action, claims 41 and 47 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 11 of U.S. Patent No. 6,706,016 to Cory et al. Applicants respectfully traverse these rejections for at least the following reasons.

The present application is a divisional of U.S. Application No. 9/989,206 which issued as U.S. Patent No. 6,706,016 ("the '016 patent"). A Requirement for Restriction was issued on September 25, 2002 for Application No. 9/989,206 in which the Examiner stated that claims "comprising marks" were a patentably distinct species. Applicants timely traversed the restriction in a reply dated October 9, 2002, but the Examiner deemed the restriction proper and final and withdrew claims 10-15, 27, and 30-34 in an Office Action mailed December 12, 2002. For the convenience of the Examiner, a copy of the Requirement for Restriction and the Office Action of December 12, 2002 affirming the restriction from the '016 patent are attached. Before issuance of the '016 patent, Applicants timely filed the present divisional application to pursue the subject matter of the non-elected claims. Specifically, claims 41 and 47 recite the same subject matter as the non-elected claims 10 and 27 of Application No. 9/989,206, respectively, redrafted in independent form.

Applicants respectfully direct the Examiner's attention to 35 U.S.C. § 121 and MPEP 804.01 regarding the rejection of a divisional application as obvious in view of a parent application. As explained in that section of the MPEP, 35 U.S.C. § 121 prohibits the rejection of a divisional application based upon its parent as part of an obviousness-type double patenting rejection. The line of demarcation between the independent and distinct inventions identified by the Examiner in the Requirement for Restriction, namely "marks," is maintained, because claims

(ATTORNEY DOCKET NUMBER: 41563-0010)

41 and 47 of the present application recite identical subject matter to the restricted and withdrawn claims and claims 1 and 11 of the '016 patent do not recite "marks." Therefore, Applicants respectfully submit that the rejections of claims 41 and 47 are improper, and respectfully request withdrawal of the obviousness-type double patenting rejection of claims 41 and 47.

Conclusion

In view of the above remarks, Applicants respectfully request that all rejections be withdrawn and that a notice of allowance be forthcoming. The Examiner is invited to contact the undersigned for any reason related to the advancement of this case.

The Commissioner is authorized to credit any over payment or charge any deficient to deposit account number 08-1641.

Respectfully submitted,

Date: September 28, 2005

DETAILED ACTION

Election/Restriction

1. Claims 1-40 are generic to a plurality of disclosed patentably distinct species comprising various embodiments for determining the depth of a needle for a nerve stimulator. Specifically, select one specie from the following list:

- Specie 1. Figures 3a-3c, comprising a linear resistance coating;
 - Specie 2. Figure 5, comprising marks;
 - Specie 3. Figure 6, comprising a strip of resistance material;
 - Specie 4. Figures 8-9, comprising an optical control mechanism.
- 2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.
- 3. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- 4. A telephone call was made to Lawrence Cullen on September 23, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR

Page 3

Application/Control Number: 09/989,206

Art Unit: 3763

1.143). In addition, applicant should provide a listing of all claims readable upon the

elected specie.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the

fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Sharon Kennedy whose telephone number is (703) 305-0154.

Election/Restriction

- 2. Applicant's election with traverse of Species 1 in Paper No. 5 is acknowledged. The traversal is on the ground(s) that four species are not an unreasonable number of embodiments in an application. This is not found persuasive because the subject matter which applicant presents is complicated, each specie requires an independent search to locate secondary references since the species do not have similar structures (of depth determination), and applicant should note that the method and apparatus claims were not restricted. Further, it is likely that an appropriate generic claim could be drafted to encompass at least some of the species.
- 3. The requirement is still deemed proper and is therefore made FINAL.
- 4. Claims 10-15, 27, 30-34 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected specie, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.

Claim Rejections - 35 USC § 102

5. Claims 1-3, 5-7, 16-19, 21-24, 35 and 36 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Griffith et al., US 5,853,373. Regarding claims drafted to changing current amplitudes, frequency, etc., and the controller, note the application of current pulses discussed by Griffith in column 3, lines 25-56, and column 8, lines 1-36. Regarding claims 2-3, 18 and 19, see column 7, lines 33-36 of Griffith for infusion of medicaments through the needle. Regarding

Application/Control Number: 09/989,206

Art Unit: 3763

claims 16 and 35, note the disclosure of the polyimide tube 28 which serves as an insulator.

Regarding claim 36 and operating the nerve stimulator with one hand, see column 3, lines 11-17 of Griffith which discloses that feature.

Claim Rejections - 35 USC § 103

6. Claims 4 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Griffith, US '373. Griffith is silent with regards to the manual switches controlling the device. However, the pressure sensitive switches claimed are notoriously old and already used in alarm clocks, microwaves, telephones, DVDs, etc. Accordingly, it would be obvious to one of ordinary skill in the art to incorporate them into the Griffith device for ease of handling.

Allowable Subject Matter

- 7. Claims 8, 9, 25, 26, 28, 29, 37-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 8. The following is a statement of reasons for the indication of allowable subject matter: The claims are directed to the electrically resistive layer in combination with the electrical trace to determine the depth of penetration of the needle, or the steps of calculating the depth of the needle using the electrically resistive layer. This manner of determining the depth of a medical instrument in not found in the prior art. Accordingly, the claims are allowable.
